

**Employment Type:** Full-Time

**Location:** Boston, MA

## Associate - Aviation Analytics

If you have a passion for aviation and analytics, a knack for problem-solving, and a desire to make a positive, lasting impact on the aviation industry, then we want to hear from you! At BlueSky, you will have the opportunity to work on challenging problems on a global scale. We provide a platform for you to make a lasting impact on the aviation industry while growing your skills and advancing your career.

### Job Description

We are seeking a talented Associate to join our team. In this role, you will be responsible for analyzing data and building models, preparing comprehensive presentations and reports, and engaging with clients both in-person and remotely. This role requires strong analytical skills, exceptional written and verbal communication, and the ability to effectively contribute to client relationships.

### Minimum Qualifications

- ✓ Hold a Bachelor or Master of Science degree in Science, Engineering, Mathematics, Economics, or related field.
- ✓ Possess at least 1 year of experience in engineering, consulting, data analytics, or related field.
- ✓ Experience in air transportation, aerospace, energy and/or environment.
- ✓ Proficient in quantitative modeling and analyzing large datasets.
- ✓ Skilled with advanced features of Microsoft Excel and Microsoft Word.
- ✓ Ability to effectively communicate complex results to technical and non-technical audiences.
- ✓ Capable of independently executing complex analytics projects with minimal supervision.

### Preferred Qualifications

- ✓ Strong familiarity with aircraft and the air transportation system.
- ✓ Skilled with data-oriented programming languages (e.g., Python, MATLAB and/or SQL).

**Where to Apply:** If you would like to learn more about exciting opportunities to join our team, please contact us at [careers@bluesky-d2d.com](mailto:careers@bluesky-d2d.com). We look forward to hearing from you!

### About BlueSky

BlueSky specializes in strategy and analytics within the space of aviation, energy, and the environment. We focus on the sustainable development of the aviation system through technology, operations improvements, sustainable aviation fuels, and market-based measures.
